First time in a SKYKING thread?
The US Air Force uses open frequencies to transmit some of their messages.
We can listen in.
The messages are encoded as long strings of alphanumeric characters.
In this case, a broadcaster identified as RAINDROP transmitted those 30 characters. It means

something to somebody somewhere.

Sine we can never decode these, it's just fun to listen and be comfy chatting about it.

>Illuminations?
From CodeMonkeyZ:
1. The SolarWinds hack is a huge deal.
2. FBI/CISA/ODNI formed a new "Cyber Unified Coordination Group (UCG)" to unify the govt and address the hack
3. Entire intelligence community is working on this.

Is this why EO13848 is delayed? The smoking gun?

If you take a globe and a thread and measure the shortest distance you get a parabola every time due the earth's volume. From mongolia to canada it would be literally a straight line, but again due the earth's volume it's still going to be a parabola around the globe. I ain't sure if you're baiting but I'm willing to take the bait. I don't care at this point.

Truth, Honor, Order, Respect, Nature (THORN)

T.H.O.R.N is a spiritual code of ethics and principles of values for all of humanity, that rises above material reality.THORN contains ideals as old as Prometheus' light. Whatever you do, whatever you believe, or faith you follow, THORN are universal principles, upon which individual greatest and civilization is achieved and sustained.

>Truth
- is the unending pursuit of wisdom, knowledge and glory, it is a search that persists, like a light in the darkness.
>Honor
- is to act with integrity, to rise above debased actions, to do our best, help others and reflect higher principles.
>Order
- is to order your life and your affairs in a manner befitting good organisation and example, glorifying God and Nature.
>Respect
- is to respect the freedom, liberty and natural rights of ALL others, where it does not infringe.
>Nature
- is to love familial relations, the glory of creation, reverence for nature and our planet.

YOU are a THORN (no matter how small, or insignificant) in the side of never ending evil .

-There is no dogma of THORN
-There is no church of THORN,
-There is no organization of THORN,
-There is no cult of THORN
-There is no leader of THORN,
-There is no controlled movement of THORN.
-There is no money made from THORN
-There is no social media acct or other 'Grifter' of THORN
-There is no political spectrum to THORN
-There is no associated movements or ideas with THORN
-There is no requirement to be of a certain faith, gender, or characteristic of THORN.

You may call yourself a THORN, THORNITE or THORNIAN, if you must.

If you have a problem with THORN, i.e:
-Truth? Then you are a liar
-Honor? Then you are dishonorable
-Order? Then you are chaos
-Respect? Then you are disrespectful
-Nature? The you are doomed as Nature is not a respecter of persons.

REMEMBER: It's not the number of good in the fight against evil, it's the good in the numbers.

God Bless anons

Nothing really happened, but I see people talking about skyking is completely disrupting the normal

flow of chat. Please talk about skyking here.

I've used this SDR for years as I'm an amateur radio enthusiast myself. The university doesn't like visitors, especially from a mongolian basket weaving forum.
There's been some close calls in the past where people are saying 'nigger' in the chat and almost got it taken down.

This thing is University run and I don't want any anons to give them even a hint of a reason to take it down.

>muh double digits
Your observation makes me think of numbers, like coordinates, but for them to be so easily visible like that would be a major flaw in the encryption. I'm guessing that the duplicates may indicate an externally testable (resistant to corruption) instruction to the internal data, for example, a new line
It must be difficult to create a spoken encryption method that requires the robustness and ease of use for low-ranking military folks, while still being resistant to compromise.

>damn whatever jannie has contrived some faulty bullshit that has made me retype this comment a dozen or so times under the error that it could be spam.

Gnostics communed with 'Natural Law' - you are a babe after death, how stupid are you to believe the noetic forces that tell you the absolution of sins is from Natural Law? Pride is the greatest of snares.

The impersonal concept of deity was actually an experience of the non-being from which we have come [already], and that the true understanding of God - the highest, fullest understanding of God is God as person, as I AM - He has revealed Himself as I AM.

Matthew 6:22 “The eye is the lamp of the body. So, if your eye is sound, your whole body will be full of light; 23 but if your eye is not sound, your whole body will be full of darkness. If then the light in you is darkness, how great is the darkness!

I would disagree. Although I'm not saying it's full-blown WWIII type movement, it's not typical of budget-blowing either. The positioning and flight patterns of the surveillance/submarine "sniffers", the shift-change (so-to-speak) of the fighter/attack aircraft, the rarely seen aircraft etc. These flight patterns appear almost defensive in nature and seem to be concentrated on US coastlines and land-border regions, which leads me to believe *something* is awry. Especially considering current geopolitical situations.

That could be it too, or a mix of the two.
After all it's not all black and white.

But unless china suddenly gets suicidal, I don't think that they would even send a single nuclear submarine that close to the US coastal line.

Chine just doesnt have the nuclear firepower to inflict enough damage to even achieve a mutually assured destruction. They just blow some cities and get flattened in return.

Truth is, with mutually assured destruction, there is a near-zero chance of large-scale nuclear war. Especially with the advancement of MOAB-type weaponry. The only nukes we would ever see deployed would be small, tactical battlefield nuclear weapons. So China doesn't necessarily require anything more than Cold War-era Davey Crockett-esque technology. However, electronic warfare being all the rage these days, China has a better chance even against the USA since all of their tech is either reverse-engineered western tech, or the other aspect that is China sells and supplies the world with all their tech. This, I believe , is why we are seeing such a defensive posturing along the coast and borders of the US; all it takes is one slip-up and china is in. Same basic concept as with cyber security/hacking.
